University of Karachi, Pakistan.

www.halalrc.org
Halal Meat is meat that is slaughtered according to shariah law Zabiha is the prescribed method of slaughtering all meat sources, excluding fish and other sea-life, per Islamic law. This method of slaughtering in animals consists of using a well sharpened knife to make a swift, deep incision that cuts the front of the throat, the carotid artery, windpipe and jugular veins. The head of an animal that is slaughtered using halal methods is aligned with the Qiblah. In addition to the direction, permitted animals should be slaughtering upon utterance of the Islamic prayers “in the name of God”.

About Gelatin

Gelatin is a protein substance derived from collagen, a natural protein present in the tendons, ligaments, and tissues of mammals. It is produced by boiling the connective tissues, bones and skins of animals, usually cows and pigs. Gelatin’s ability to form strong, transparent gels and flexible films that are easily digested, soluble in hot water, and capable of forming a positive binding action have made it a valuable commodity in food processing, pharmaceuticals, photography, and paper production.
Key to explore the new horizon of Halal Meat Industry

Contents
